

Mother's Day Facts

Anna Jarvis was the driving force behind Mother's Day as she organized observances in Grafton, West Virginia, and Philadelphia on May 10, 1908. As the annual celebration became popular around the country, Jarvis asked members of Congress to set aside a day to honor mothers. In 1914, she finally succeeded and Congress designated the second Sunday in May as Mother's Day. Today Mother's Day is considered one of the biggest holidays of the year, second to the winter holidays. The Indiana Business Research Center presents statistical facts about this holiday both for the United States and in Indiana.

Working and Stay-at Home Moms

5.1 million

Number of stay-at-home moms in the United States in 2009—down from 5.3 million in 2008. In 2009, 22.6 percent of married-couple family groups with children under 18 had a stay-at-home mother, down from 23.7 percent in 2008.

Compared with other moms, stay-at-home moms in 2007 were more likely to be:

- Younger than 35 years old (44 percent of stay-at-home moms vs. 38 percent of mothers in the labor force)
- Hispanic (27 percent vs. 16 percent)
- Foreign-born (34 percent vs. 19 percent)
- Living with a preschool-age child (57 percent vs. 43 percent)
- Without a high school diploma (19 percent vs. 8 percent)

65.3 percent

In married-couple households with children under 18, 65.3 percent of wives were employed or in the Armed Forces in 2008. This compares to 92.3 percent of husbands in the same households. Another 24.6 percent of the women were not in the labor force and may have been stay-at-home moms.

75.9 percent

Percentage of Hoosier single mothers with children under 18 who were either employed or in the Armed Forces in 2008. Nearly 15.8 percent of single mothers were not in the labor force and could have been stay-at-home moms.

57.1 percent

First-time mothers in the early 2000s who worked at a full-time job (35 hours or more) during their pregnancy. Over time, this percentage has steadily increased from 39.7 percent in the early 1960's.

57.7 percent

First-time mothers who worked through their pregnancy in the early 2000s that were working by the third month after they gave birth. In the early 1960s, the corresponding percentage was 16.5 percent.

83 percent

Percentage of mothers who went back to work within a year of their child's birth who returned to the same employer in the early 2000's. Seven in 10 of these women returned to jobs at the same pay, skill level and hours worked per week.

Remembering Mom

83.8 percent

Proportion of Midwestern individuals who will celebrate Mother's Day this year. Nine percent declare they will celebrate it more compared to the 14.6 percent who will celebrate it less than last year.

\$14.6 billion

Expected total spending by Americans for Mother's Day in 2010. This would be an average of \$126.90 per person, a 2.4 percent increase from 2009.

Top 5 gifts expected to be given in 2010

Rank	All of U.S.	Midwesterners
1	Card (81.5%)	Card (80.9%)
2	Flowers (65.2%)	Flowers (62.0%)
3	Special Outing- meal (51.8%)	Special Outing- meal (50.8%)
4	Gift Certificate (34.1%)	Gift Certificate (31.8%)
